

System settings

After starting the file gateway you need to set the necessary parameters in the **NRD.DesktopShell.exe.config** (Fig. 1). To do this:

1. open a text editor as administrator;
2. open **NRD.DesktopShell.exe.config** file through a text editor;

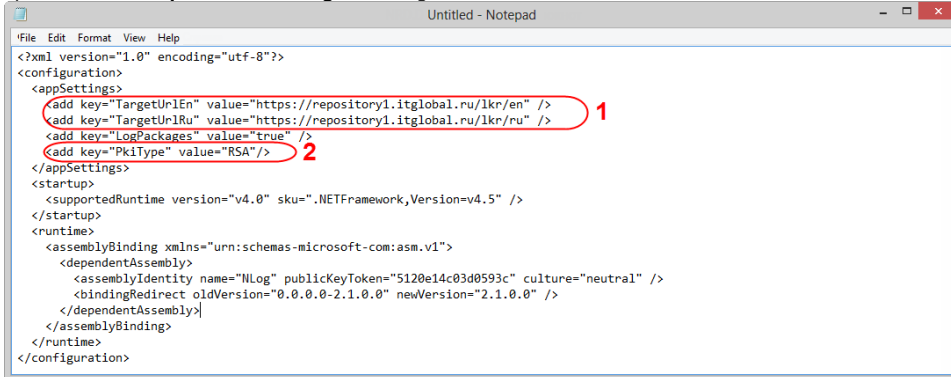

Figure 1 – edit the **NRD.DesktopShell.exe.config** file

3. specify the Web-client URL (Fig. 1,1) (by default <https://repository1.itglobal.ru/lkr/>).
For test environment:
 - a. <add key="TargetUrlEn" value="https://repository1.itglobal.ru/lkr/en" />;
 - b. <add key="TargetUrlRu" value="https://repository1.itglobal.ru/lkr/ru" />.For production environment (GOST and RSA cryptography):
 - a. <add key="TargetUrlEn" value="https://cabinet.nsd.ru/repository/en" />;
 - b. <add key="TargetUrlRu" value="https://cabinet.nsd.ru/repository/ru" />.

Depending on the system locale when running the Desktop client will open Russian or English version of the Web-client;

4. type of cryptography: **PkiType** parameter, values **RSA** or **GOST** (Fig. 1,2);
5. save edited **NRD.DesktopShell.exe.config** file.
