Access and technical support

The Web-client along with the LUCH Software is a part of the NSD Electronic Data Interchange System. If a client has already an access to the EDI system, it is necessary to obtain only a login and a password to the Web-client separately the test and production environment as described below. If a client has no access to the EDI system, it is necessary to do.

The **Web-client** is available for users in two profiles:

1. test profile designed to introduce the principles of work and functionality of the system, and to test the Web-client;
2. production profile designed to generate messages on the performed trades for the registration and to submit them into the registry.

On this page:

- Access to the Web-client in the test environment
- Access to the Web-client in the production environment

The procedure of getting access differs depending on the version: test or production.

Access to the Web-client in the test environment

As mentioned above, the Web-client is a part of the EDI system, i.e. client space. Therefore, for a comprehensive testing of the Web-client, a client should have an acess to test environment, a repository code and related certificate.

Companies not involved in the test environement, nevertheless, may obtain a login and a password to the Web-client, but they will not be able to liaise with the Repository system (i.e. submit reports and receive messages from the Repository).

To obtain a login and a password to the test Web-client you should write to soed@nsd.ru, indicating *"Access to the tested Web-client of the Repository"* in the subject and the following information in the letter body:

- Name of the Company;
- Name and contact details (tel and email) of a person with whom the technical support will coordinate;
- Repository code (if connected to the EDI system);
- Certificate type, GOST or RSA (if connected to the EDI system).

In a return email you will get a link to ther Web-client (http://repository1.itglobal.ru/lkr/en/account/login), your login and a password.

Access to the Web-client in the production environment

An access to the Web-client in the production environment is provided only to the Repository's clients. A detailed description how to get an access to the Repository is available in the NSD web-site.

To get a detailed information on how to obtain access to the Web-client in the production environment, please, contact Client Services department.
